## Memorandum

---

Date: October 20, 2006  
To: Randy Chafin  
From: Ron Richardson PE 53589  
Subject: Peer Review of Fiddler Green Drainage Study

---

Distribution:

---

The following is a peer review of Bohemia Subdivision Drainage Study, dated January 9, 2006, prepared by PSOMAS. The report was assessed for consistency with Placer County Storm Water Management Manual and determines whether it adequately analyzed the proposed Project's downstream impacts. The project meets the detention storage requirements set forth in the Placer County Storm Water Management Manual. Follow up drainage improvement plan check will be required to insure proper detention basin design. The report did not contain water quality issues.
